Defenses. Heavy Armor Master: each hit's bludgeoning, piercing and slashing damage is reduced by 6. **Resistance:** acid, radiant, necrotic. **Immunity:** poison, disease, Charmed, Frightened, Poisoned. **Weakness:** no defense against lightning, and 20+ lightning from one source shorts him out (no Reactions or Sandevistan until the end of his next turn). **Saves:** Advantage against spells and magic (ICE) and on Con saves (pain editor); Indomitable rerolls at +20 three times a day; Mage Slayer turns one failed Int, Wis or Cha save into a success each short rest. **Senses:** darkvision 120 ft; smoke, fog and nonmagical darkness don't block his sight; Advantage on sight- and hearing-based Perception.

PROFICIENCIES

Armor: all armor and shields; he wears his own plating.

Weapons: Simple and Martial, firearms included.

Tools: Tinker's Tools, playing cards.

Languages: Common (English), Japanese, +1.

Weapon Mastery (6): Chain Gun · Slow, Blast Cannon · Push, +4 more; Tactical Master swaps to Push, Sap or Slow.

ATTACKS

WEAPON	HIT	DAMAGE	NOTES
Smart Chain Gun (+2) HB	+15	2d8+7 piercing	Range 100/400. Ignores cover; no penalty at long range or in melee (Sharpshooter). Burst Fire: a 10-ft cube, DC 19 Dex save or take 2d8+7. Slow.
Burstfire Blast Cannon HB	+13	4d10 force	Right arm. Range 30/120, Loading. A hit pushes a Large or smaller target 15 ft and knocks it Prone unless it makes a DC 22 Str save.
Panzerfaust Fists HB	+14	2d8+8 bludgeoning	Unarmed Strike (Wolver claws: slashing). Punch and Grab; crushing grip 2d8 a turn; Crusher pushes 5 ft.
Pop-up Autoshotgun HB	DC 19	6d6 piercing	Replaces one attack: 15-ft cone, Dex save for half. 2 shots per short rest. The gun that cut Johnny Silverhand in half.
Missile Barrage HB	DC 19	4d6 fire + 4d6 bludg.	Action, Recharge 5–6: four 10-ft blasts within 300 ft, Dex save for half. Mortar mode: lands next turn, double dice.
Seismic Slam HB	DC 22	4d10 bludgeoning	Part of his move, Recharge 5–6: a 30-ft leap; Str save or Prone within 10 ft of the landing. Then attacks against him have Advantage.

Four attacks per Attack action, eight with Action Surge. **Irresistible Offense:** his B/P/S damage ignores Resistance; a natural 20 adds 20. **Savage Attacker:** reroll one weapon's damage each turn. **Charger:** +1d8 or a 10-ft push after a 10-ft run. **Maneuvers:** d12, DC 22.

CHROME

His cyberware, all HOMEBREW, built from the 2024 rules' own parts · integrated, so none of it takes an attunement slot

IEC Dragoon Full-Body Conversion

Legendary · about 96% of him is machine; what's left of the man rides in a biopod

Frame. His size is Large and his Strength score is 27. He can use Strength for Intimidation checks.

Armor plating. Base AC 20. Counts as Heavy armor he always wears and can't take off.

Machine body. Immunity to poison damage, the Poisoned condition and disease; Resistance to acid (2077's "chemical" damage). He doesn't eat, drink, breathe or sleep; 6 hours of standby, fully aware, is a long rest. He counts as a Construct as well as a Humanoid (in 2077, as an android).

Siege frame. Double damage to objects and structures. Cover doesn't last around him.

Weakness: electricity. No defense against lightning. When one source deals him 20+ lightning damage, his systems short out: no Reactions and no Sandevistan until the end of his next turn.

Armor Regeneration Matrix

Very rare · from his Cyberpunk RED stat block

Once per long rest, when he drops to 40 HP or fewer without dying, his plating reknits: he gains 40 temporary HP, and a cracked chest plate (page 5) seals.

Experimental Sandevistan

Legendary · added to his 2077 fight in update 2.1, "much like in Edgerunners"

Overclock. Bonus Action, once per short rest. For 3 rounds the world crawls: his Speed doubles, he has +2 AC and Advantage on Dexterity saves, Opportunity Attacks against him have Disadvantage, and on each of his turns he gets one extra action (Attack with one attack only, Dash, Disengage or Utilize).

Counter-Sandevistan. When a creature he can see within 60 ft speeds itself up (a Sandevistan, *haste*, anything that grants an extra turn), he can switch his own on as a Reaction. That's how he kept up with David.

Heat sink. When Overclock ends, he can't take Reactions until the end of his next turn.

Arasaka Military ICE

Very rare · shrugs off stacked quickhacks and hacks back (2.1); it stopped Lucy cold

Firewall. Advantage on saves against spells and magical effects (Night City's quickhacks). He can't be Charmed.

Counter-hack. Reaction when a creature he can see within 60 ft targets him with a spell or forces him to save against one: it makes a DC 19 Intelligence save, taking 4d10 psychic damage on a failure or half on a success.

Panzerfaust Fists & Wolvers

Very rare · Gorilla-pattern cyberarms (RED's Panzerfaust Fists) with Wolver claws (Cyberpunk 2020)

His Unarmed Strikes deal 2d8 + Strength bludgeoning, or slashing with the claws out. He can grapple creatures up to Huge. **Crushing grip:** a creature he has Grappled takes 2d8 bludgeoning at the start of each of its turns.

Hydraulic Legs & Jumpboosters

Very rare

His jumps don't need a run-up. **Seismic Slam** (Recharge 5–6): as part of his move he leaps up to 30 ft and comes down like a dropped car. Each creature within 10 ft of the landing makes a DC 22 Strength save, taking 4d10 bludgeoning and falling Prone on a failure, or half on a success. **The kneel:** the landing jars his frame, so attacks against him have Advantage until the start of his next turn.

Pain Editor & Radiation Shielding

Rare · how he survived the bomb that brought down Arasaka Tower in 2023

He can't be Frightened and has Advantage on Constitution saves. Resistance to radiant and necrotic damage.

Combat Optics & Cyberaudio

Rare · thermal and targeting optics, red-eyed skull faceplate

Darkvision 120 ft. Smoke, fog and nonmagical darkness within 120 ft don't block his sight. Advantage on Perception checks that rely on sight or hearing.

Weapon Mounts

Legendary · the arsenal built into the frame

Smart Chain Gun (+2, left arm). Martial Ranged, 2d8 piercing, range 100/400, no Loading, 80-round belt (reloading is an action). **Smart:** ignores Half and Three-Quarters Cover. **Burst Fire** (DMG): instead of one attack, he sprays a 10-ft cube within 100 ft; each creature in it makes a DC 19 Dexterity save or takes the weapon's damage (uses 10 rounds). Mastery: Slow.

Burstfire Blast Cannon (right arm). Martial Ranged, 4d10 force, range 30/120, Loading; no Disadvantage at point-blank range. On a hit, a Large or smaller target makes a DC 22 Strength save or is pushed 15 ft and knocked Prone. Mastery: Push.

Pop-up Autoshotgun. In place of one attack: a 15-ft cone; each creature in it makes a DC 19 Dexterity save, taking 6d6 piercing on a failure or half on a success. 2 shots, reloaded on a short rest.

Shoulder Missile Launcher. *Missile Barrage* (action, Recharge 5–6): up to four points within 300 ft each erupt in a 10-ft-radius blast. Each creature in a blast makes a DC 19 Dexterity save, taking 4d6 fire + 4d6 bludgeoning on a failure or half on a success; a creature in several blasts is hit once. *Mortar mode:* instead, he paints the points with red targeting circles; the missiles land at the start of his next turn for double dice, on whoever is still standing in them.

CLASS FEATURES · the red note is what each one stands for in Cyberpunk

Fighter 20 — the Solo

Fighting Style: Archery F1 · smart-linked targeting — +2 to attack rolls with Ranged weapons.

Second Wind F1 · shrugging it off — Bonus Action: regain 1d10 + 20 HP. 4 uses; 1 back on a short rest, all on a long rest.

Weapon Mastery F1 · weapon mounts — uses the mastery properties of six kinds of weapon, including the chain gun (Slow) and blast cannon (Push).

Action Surge F2, F17 · RED: an extra action every round — one extra action on his turn. 2 uses per short rest, one per turn.

Tactical Mind F2 — when he fails an ability check, he can spend a Second Wind use to add 1d10; if it still fails, the use isn't spent.

Extra Attack F5, F11, F20 · punch combos, chain-gun bursts — four attacks per Attack action.

Tactical Shift F5 — when he uses Second Wind, he can move half his Speed without provoking Opportunity Attacks.

Indomitable F9, F13, F17 · nothing stops him — reroll a failed saving throw with +20. 3 uses per long rest.

Tactical Master F9 · 2.1: he adapts to your build — when he attacks with a weapon whose mastery he knows, he can swap its mastery for Push, Sap or Slow for that attack.

Studied Attacks F13 · he learns your rhythm — after he misses a creature, he has Advantage on his next attack against it before the end of his next turn.

Battle Master

Combat Superiority F3, F7, F10, F15, F18 — 6 Superiority Dice, d12s, all back on a short rest. Maneuver save DC 22.

Student of War F3 — Tinker's Tools (he patches his own chrome) and History (a veteran of the Fourth Corporate War).

Know Your Enemy F7 · 2.1: reads your build and counters it — Bonus Action: learn a creature's Immunities, Resistances and Vulnerabilities within 30 ft. Once per long rest, or spend a Superiority Die to use it again.

Relentless F15 — once per turn, he can roll a d8 for a maneuver instead of spending a Superiority Die.

Maneuvers (9)

Precision Attack targeting optics — when he misses, add the die to the attack roll.

Pushing Attack the shoulder charge — add the die to damage; a Large or smaller target makes a Strength save or is shoved 15 ft.

Trip Attack the combo finisher — add the die to damage; a Large or smaller target makes a save or falls Prone.

Menacing Attack "You're all the same meat to me" — add the die to damage; Wisdom save or Frightened until the end of his next turn.

Sweeping Attack the backhand that clears a room — on a melee hit, a second creature within 5 ft takes the die's roll in damage if the attack would hit it too.

Riposte punishing a whiff — Reaction when a creature misses him in melee: attack it, adding the die to the damage.

Goading Attack eyes on him — add the die to damage; Wisdom save or Disadvantage on attacks against anyone but him until the end of his next turn.

Lunging Attack the rush — Bonus Action: spend a die to Dash; if he moves 5+ ft straight before a melee hit this turn, add the die to its damage.

Commanding Presence Arasaka's attack dog — add the die to an Intimidation, Performance or Persuasion check.

FEATS (9)

Savage Attacker Soldier · overkill — once per turn on a weapon hit, roll its damage dice twice and keep either.

Alert Human · RED: he always acts first — adds his Proficiency Bonus to Initiative; can swap Initiative with a willing ally.

Heavy Armor Master F4 · bullets bounce off — +1 Con; B/P/S damage from each hit is reduced by 6.

Sharpshooter F6 · smart guns — +1 Dex; ranged attacks ignore Half and Three-Quarters Cover and suffer no penalty at long range or in melee.

Mage Slayer F8 · netrunner killer — +1 Con; damaged concentrators save at Disadvantage; once per short rest, a failed Int, Wis or Cha save succeeds instead.

Grappler F12 · hands that crush skulls — +1 Dex; once per turn an Unarmed Strike both damages and grapples; Advantage on attacks against someone he holds.

Charger F14 · the charge — +1 Dex; Dash gives +10 ft; after a 10-ft straight run, a melee hit deals +1d8 or pushes 10 ft.

Crusher F16 · Panzerfaust punches — +1 Con; a bludgeoning hit pushes 5 ft once per turn; a bludgeoning crit gives everyone Advantage on the target.

Boon of Irresistible Offense F19 · military-grade armor piercing — +1 Dex; his B/P/S damage ignores Resistance; a natural 20 adds 20 damage.

Origin. Human: Resourceful (Heroic Inspiration each long rest), Skillful (Survival), Versatile (Alert). **Soldier background** (US Army, discharged): Athletics, Intimidation, playing cards, Savage Attacker.

"You're all the same meat to me."

WHO HE IS

Adam Smasher grew up in the Bronx. When his gang was wiped out he joined the US Army, which threw him out for conduct violations. Back in New York he worked as a hired gun until a job went wrong and rockets blew him apart. An Arasaka representative gave him a choice: die, or become a full-body cyborg. He took the chrome and never looked back. **"Metal is better than meat."**

As Arasaka's attack dog he became a legend among mercs and a rival Morgan Blackhand barely acknowledged. On **20 August 2023**, during the Militech raid on Arasaka Tower, he killed Johnny Silverhand. Then he fought Blackhand on the roof and survived the bomb that brought the tower down.

Fifty years later he is Yorinobu Arasaka's bodyguard, then his head of security. In **2076** (*Edgerunners*) Arasaka sent him after David Martinez's crew. He dropped onto Rebecca, matched David's Sandevistan with his own, tore the exoskeleton off him and shot him point-blank. In **2077** he is the last thing standing between V and Mikoshi.

PERSONALITY

Traits: Loves violence for its own sake and feels nothing for anyone, coworkers included. Mike Pondsmith calls him a high-functioning cyberpsycho: completely insane, completely in control.

Ideal: Metal is better than meat, and everyone else is meat.

Bond: Arasaka, the corporation that rebuilt him. He's loyal the way a gun is loyal to the hand holding it.

Flaw: He enjoys it. He taunts, he toys with his prey, and he takes jobs for the mayhem.

APPEARANCE

A hulking war borg in Arasaka-branded plating, with huge pauldrons and a skull-like faceplate lit by red optics.

By most accounts he's about 96% machine; what's left of the man is little more than a brain riding in a biopod. His frame dwarfs anyone standing next to him.

ARASAKA TOWER PROTOCOL · optional rules for running him as the 2077 boss

Phase 1, above half HP. Full arsenal.

Phase 2, the first time he's Bloodied (112 HP). His right arm is blown off: no Blast Cannon, no right fist. He calls in **Arasaka backup**: four Arasaka ninjas (use the Assassin stat block) arrive at the end of the round. From here on, his Sandevistan recharges on a 5–6 at the start of each of his turns.

Phase 3, at 40 HP or fewer. His chain gun is dry and the launcher is wrecked, so it's melee only, and the fists still hit like trucks. The Armor Regeneration Matrix fires.

Weak point: the heart. His cybernetic heart sits behind a chest plate. A critical hit cracks the plate: until the Matrix seals it or he finishes a long rest, his AC drops by 2 and attacks score critical hits against him on a 19–20.

Weak point: the launcher. AC 20, 30 HP. Destroy it and Missile Barrage is gone.

Weak point: the right arm. AC 20, 50 HP. Destroy it and Phase 2 starts early. Damage to a weak point doesn't come off his HP.

The end. At 0 HP the party can spare him or finish him. He'd never return the favor.

BUILD NOTES

Why Fighter 20: Smasher is the ultimate Solo, Cyberpunk's combat role. Battle Master maneuvers stand in for the Solo's Combat Awareness, Know Your Enemy and Studied Attacks for 2.1's adaptive AI, and Alert plus two Action Surges for RED's "always acts first, takes an extra action".

Ability scores: 27-point buy (Str 8, Dex 15, Con 15, Int 10, Wis 10, Cha 13), then Soldier +1 Dex and +2 Con. The Dragoon frame sets Strength to 27.

Power warning: his chrome is boss-grade, like Guts' Berserker Armor. It's tuned for Smasher, who is the boss in every story he's in, not for a party member.

WHAT 5E CAN'T COPY

- Real-time bullet-time. The Sandevistan's three rounds of extra actions are the closest fit.
- An AI that rewrites itself mid-fight. Know Your Enemy and Studied Attacks are the turn-based version.
- Ammo counters, heat and cyberware cooldowns, beyond the chain gun's belt and the autoshotgun's 2 shells.

Version: Cyberpunk 2077 as of update 2.1, which reworked his fight; no later patch changed him. Researched from the 2.1 patch notes, boss guides (GamePressure, PowerPyx, ScreenRant, Fextralife), Edgerunners recaps, and secondhand summaries of his Cyberpunk 2020 and RED stat blocks. The Cyberpunk fandom wiki couldn't be reached, so a few tabletop details are unconfirmed.
